Bisexual Young Friends bb bg

Chastity has been an important value since the 1300s when the word came into use. Many people believe that it became an important value to avoid pregnancy outside of marriage. The importance of Chastity has always been preached to teens. But what if something happened that totally change the view of chastity and attitudes about all types of teen sexual activity. Welcome to Boner Island where teenagers and preteens are about to experience a complete redefinition of what is acceptable sexually.

*As always, if you are not supposed to be reading this story...then please don't...please practice safe sex. This story is a total fantasy. Thanks to everyone who has taken the time to write me. Your encouragement, ideas, fantasies and personal experiences are very much appreciated. Your thoughts and ideas are always welcome at [mack1137@gmail.com](mailto:mack1137@gmail.com).*

*Please let me know what you like to read about and what turns you on. If you are curious about my background and/or would like to share your thoughts and ideas on erotic story telling in a more public forum, please visit <http://mack1137.sensualwriter.com> .*

## **Boner Island 1**

Chastity has been an important value since the 1300s when the word came into use. Many people believe that it became an important value to avoid pregnancy outside of marriage. The importance of Chastity has always been preached to teens. But what if something happened that totally change the view of chastity and attitudes about all types of teen sexual activity. Welcome to Boner Island where teenagers and preteens are about to see sexual relationships and what is acceptable to be completely redefined.

Josh and Nancy looked out the window of the Acme Pharma company plane as it prepared to land on Boner Island. Nancy laughed and pointed at Boner Island as it came into view.

They told them what to expect when they saw the island for the first time. They still were not prepared for the shape of the island. It looked exactly like a large erect penis and scrotum. Nancy and Josh could not stop laughing.

They can't be serious. They want to test the hottest new behavior modification drug here? Nancy asked Josh.

It is ironic. These kids and their parents have no idea of the changes that are about to happen in their lives. Josh said as he took Nancy's hand as the plane circled to land.

The plane descended quickly and bumped a few times as it landed on the runway. The co-pilot lowered the air stairs just as a large black SUV pulled up beside the plane.

As Josh and Nancy deplaned, they met Dr. Tim Jackson. Tim helped them unload all of their luggage and supplies from the plane. Once the last box of the NuChas serum was loaded in the SUV, Tim closed the back gate of the SUV and they all climbed in.

I wanted you to have had a chance to get relaxed and refreshed after your flight, but there will not be time. Tim told them. We have scheduled the boys for their injections this afternoon. I received a call and was told that the 11 year old boys have already been told to strip naked. They have been told to wait for us in the gym.

How many 11 year olds? Nancy asked Tim as she checked her clinical trial notes.

There are 35 and none of them have had a seminal ejaculation. About half of these boys have had a dry orgasm.

Excellent, Josh told Tim. Have the boys been prepared on what to expect after the injection?

The suddenness of starting the drug trial did not give us much time. We are concerned that neither the kids nor the parents have been properly prepared for the effects of the drug. They really haven't any idea of what to expect on they receive the injection of NuChas. Tim explained to Josh.

Tim wondered out loud if a more thorough briefing could be scheduled for later in the afternoon.

With a worried look Nancy explained to Josh that the afternoon schedule is very tight. They have scheduled over 175 boys this afternoon. The scheduled injections included all of the 11 through 15 year old boys on the island.

Tim expressed his doubts about being able to meet with all of the boys later in the afternoon. A meeting scheduled for tomorrow maybe the only option.

The reported results from the early testing of NuChas said that the sex drive for all of the injected boys increased dramatically within hours of the injection. The vast majority of the boys in the early test masturbated 2 to 4 times the night of the injection. The older boys will be shocked if they masturbate two times tonight. The second orgasm will be a dry orgasm, Josh told Tim. The youngest boys in the study experienced a powerful sex drive the evening of the injection. They had rampant erections and were thrusting against everything they could find and humping the air trying to get release. All of the boys lost their inhibitions about being naked in front of family and friends.

When they arrived at the Boner Island School gym they found over 75 naked 11 and 12 year old boys. Josh looked at all of the naked boys and thought about the transformation that their young lives will soon have experienced. He looked at the 12 year old boys and saw the early signs of pubic hair. That will have changed too in a few days!

The 3 doctors washed their hands and entered the curtained exam rooms where the boys were to be injected.

The first boy walked in to Josh's exam room. He is covered his penis. Josh lifted him up on the end of the exam table and asked his name.

I'm Thomas, the cute blue eyed blond boy told Josh.

The frightened naked 11 year old sat there as Josh introduced himself. Josh saw that the boy still covered his penis with his hands.

Are you hard? Josh asked the shy boy.

Thomas blushed and nodded yes.

Josh explained that it was normal to get hard. Then he explained that the shot would Thomas get hard a lot. Thomas continued to lie there naked with his hands crossed over his erect member. Josh told Thomas not to worry as he gently pulled Thomas' hands away and revealed a perfect 3" erection.

Josh inspected the boy's tiny scrotum and swabbed a spot right along the mid line with alcohol. Josh reached for the first syringe of the day and injected the boy while telling him that the medicine may cause a burning sensation for a few minutes. Thomas winced as he received the injected NuChas.

You did great Thomas. The nurse waited at the curtain for the naked blond boy. She handed Thomas a letter for his parents and told him to go get dressed.

---

## TWO MONTHS AGO...

Josh Smith lived in a small community in the North East and worked at a well respected medical school. Josh graduated from medical school with an MD and a PhD. All he has ever dreamed about doing is Medical Research.

As Josh finished his MD & PhD, he decided to partner on his thesis research project with Nancy Simmons who was also finishing her residency in Endocrinology. In addition to being colleagues, Nancy and Josh were lovers. Nancy was both beautiful and insatiable lover. They literally had sex morning, noon and night. Nancy particularly loved Josh's 8" erection.

One evening after sex while Nancy toyed with Josh's 6" flaccid member, she asked him about his journey through puberty. She was particularly interested in knowing if Josh was a late bloomer.

Josh told her that he developed late and had always been embarrassed about it. Josh told Nancy that he developed a tiny bit when he was 12 and then stopped. He explained that sexual development stopped until he was in college. All those years I was under developed sexually.

How far behind other boys was your development? She asked him.

Essentially I had the penis and body of a 13 year old when I was 19. I was very embarrassed. Josh told her with down cast eyes.

Nancy got very excited. She confided to Josh that she has always appreciated well endowed men. Nancy explained to Josh that he is her fourth well endowed lover. She learned that all four of the well endowed men were late bloomers in terms of puberty. Nancy wondered out loud if there is a connection between delayed development and the large penis. She told Josh that she is going to do some research to see if there is a connection between a man having a large penis and delayed sexual development.

The next morning after doing some research on the internet, Nancy rushed to Josh's office and told him that she found some research that supports the idea of a connection between delayed onset of puberty and being well endowed. She could not contain her excitement about a drug company that is ready to do large scale testing of a drug to suppress the beginning of puberty. She told Josh about the boys in the early testing that developed significantly larger than average penises and testicles as a result of the drug. She was fascinated. She told Josh that she wanted to talk to the drug company about management of the clinical trial. She wondered aloud if the two of them might have the opportunity to manage the clinical trial of the new drug.

Ten days later Nancy and Josh are flew to meet with the management of Acme Pharma. While they were on the plane she whispered in Josh's ear that she was sorry they did not

have time for their normal morning love making. When she was sure no one watched them, her hand slipped into Josh's lap where she stimulated a powerful erection. Nancy stopped when the flight attendant came down the aisle prior to landing. They drove to Acme Pharma's headquarters.

The meeting was in a large conference room with the President of Acme and his research team. Tom Adams, the president, explained to Nancy and Josh that early tests of their new drug, NuChas, suppressed production of the hormone that causes secondary sexual characteristics in males like pubic hair and beard, semen production. They tested NuChas on a small sample of boys. NuChas minimized many of the behavioral problems that teen males typically experienced during puberty. The positive effect was accomplished without causing delayed overall physical development. Their bodies achieved normal height and weight for their age they developed without secondary sexual characteristics.

Josh asked Tom Adams how NuChas works.

Tom Adams explained that when young males received the drug before first ejaculation of semen, NuChas delayed the production of semen and development of secondary sexual characteristics. The result was that boys that receive NuChas did not have pubic hair, under arm hair or need to shave until they receive a shot of the hormone to reverse the process. Their bodies were smooth.

Adams explained that the boy's bodies continued to grow naturally. They achieve their normal height for their age. The only real difference is the size of their penis and testicles. The penis and testicles will develop rapidly and grow to be about 20% to 25% larger than they would have developed without NuChas. These boys have smooth bodies, perfect skin and have much larger than normal members.

Dr. Bellinger how much larger will their penises be? Nancy asked the head of Research and Development.

Dr. Bellinger, the head of Research and Development, explained that about 3 month after the first injection an 11 year old boy who might normally have a 3.5" erect penis will have a 4" to 4.25" penis. When penises fully develop, an average man has a 6" erection. These boys will probably have thick 7.5" erections. The boys in the test had man size penises by the time they were 14.

What about their ability to have erections and orgasms? Josh asked Dr. Bellinger.

The boys had frequent erections and with stimulation will have dry orgasms much like those experienced by 10 and 11 year old boys. The treatment stimulated them to become erect much more frequently than normal. The boys were erect most of the day. Their penises were very sensitive and they had frequent orgasms. The difference was that they do not lose their erection after orgasm. Some of the boys had 10 to 12 orgasms a day.

The sensitivity of their erect penis tended to cause them to want to be naked much of the day.

You mention that early testing of NuChas resulted in improved behavior among the boys that had the injections. What exactly did you observe? Nancy asks Dr. Bellinger.

The boys are much more relaxed and find it very easy to form relationships. Their families adapted quickly to the changes particularly boys needing to be naked much of the day. In the test there was a new family closeness and all of the members of the families seem to enjoy it. You know how younger boys like to cuddle with their mom and dad. These boys enjoyed cuddling with family. They tended to cuddle with their family naked. We want to see if this holds true in a larger sample.

You mean there were 13 to 15 year old boys cuddling naked with their parents, brothers and sisters, Josh asked Dr. Bellinger.

Josh it was amazing. Families became totally comfortable with nudity and being openly sexual with each other.

Wow that must be interesting to have observed, Josh replied. Has NuChas been tested on boys that have already achieved the ability to ejaculate semen? Josh asked Dr. Bellinger.

Yes it was tested on older boys who had already had seminal ejaculations. Within hours the boys stopped ejaculating semen. In 48 hours most of the boys lost their pubic hair, beard and under arm hair. Their penises grew very rapidly and in a few months were significantly larger.

Did the older boys adjust well to the changes? Josh asks them.

Yes the older boys who masturbated frequently commented about the difference in the intensity of the orgasm. The new orgasms were not as intense as what they were used to having. They found that having 8 to 10 orgasms a day and not having to hide their sexual activity more than made up for the difference. They loved having a much larger and thicker penis.

What about the boys' sexual behavior? How was it different than normal? Nancy asks Dr. Bollinger.

Well a lot of things are different. You must remember that these boys will be erect most of the time. They did not find clothes comfortable because the friction of the fabric against their sensitive penis tended to cause more orgasms. They liked being naked most of the time. Now imagine having a 13 year old boy with a 6.5" erection naked around the house. The women in the house knew that the boys cannot produce semen and almost never lost their erection. It had a profound effect on their family relationships and friends. The boys loved to cuddle and the girls and moms really liked that. Even fathers

and brothers enjoyed cuddling with the boys while they watched football games. All of the boys tended to be very active sexually with their entire family.

---

As Josh waited for the next boy, he tried to imagine Thomas in a month or so. Thomas' body will have transformed dramatically. The most dramatic change will be the size of the 11 year old boy's member. In 4 to 6 weeks Thomas will have a 4" erection and he will have experienced 8 to 10 orgasms in a typical day. Josh tried to visualize a school with about 175 boys having orgasms all day long.

The boy's attitudes about modesty will have changed dramatically. In the drug's early trials, boys thought it normal to unzip and fondle erections in class. They stroked off in front of all of their classmates until they achieved orgasm. Josh rubbed his own erection as he started to think back over the last two months and the amazing opportunity that presented itself with these boys and their families.

Josh snapped back to the present moment as the nurse brought him the next 11 year old boy.

Steven was introduced to Dr. Josh by the nurse.

The stream of boys continued for several more hours.

As Josh injected a 15 year old boy named Jason, he observed that the boy had well developed secondary sexual characteristics. Jason asked what taking this drug would do to him.

Josh explained how life changed for the boys in the early test. Josh lightly rubbed the stubble on Jason's face and that the boys in the test lost their beard, pubic hair and under arm hair a couple of days after the injection.

What about my legs and chest hair? Jason asked him.

That disappeared too for the boys in the test, Josh told Jason and noticed that the boy became erect.

You mean they were completely smooth? That would be pretty hot. Jason told Josh and blushed as he hid his growing erection.

The boys in the study were hard so much they wanted to be naked as much as possible. They were not embarrassed that family and friends saw them naked with a boner.

You mean I'm gonna hang out around the house naked in front of mom and my sisters.

Josh nods and tells him that will become perfectly normal.

What about Janie, my girlfriend? What will she think of all of this? Jason asks the doctor.

In the earlier testing of the drug, girls seem to be very turned on by guys who are hard all the time and smooth. Josh told Jason.

You mean...she will want to.... Jason asks the doctor.

Yes she'll probably want to have sex with you very soon. Josh told him as he pulled out a tape measure. He measured the length of Josh's erection and saw that the 15 year old boy was 5.5". Josh told Jason that was impressive, but when this injection starts to work your penis will grow to be about 7" to 7.5 inches long and probably 3 times thicker than it is now. Josh noticed as he held Jason's member that he, like many of the other boys on the island had not been circumcised. Jason's foreskin extended over the tip of his penis about 3/4". Josh retracted the foreskin and observed that the boy was leaking a large quantity of precum. Josh rubbed the precum with his thumb and massaged the underside of Jason's erection. Jason gasped. Ohhhh....nooo... Jason's erection erupted and the handsome boy ejaculated semen all over his chest and his chin.

Semen won't be a problem for a while. Josh told Jason as he used a paper towel and wiped up the boy's hot seed. By this time tomorrow you will be having dry orgasms or even possibly sooner.

Jason looked disappointed. I love the idea of having a big cock, but I am not sure about not shooting seed anymore. Jason told the doctor.

8 to 10 orgasms most days will more than make up for the temporary loss of semen.

Jason's jaw drops as he looks at Josh in amazement.

---

3:30 pm School ends

Thomas the first 11 year old that Dr. Josh injected was riding the bus home with his 13 year old brother Eddie. Both boys were painfully hard, but afraid to talk about it on the bus. Eddie saw Thomas squirming around in his seat with an obvious boy boner.

I know Thomas...I got one too, Eddie told his little brother.

Earlier at home Thomas' 17 year old brother Alec read the letter that came last week from the school about the drug test. Mid-term exams were near and Alec needed to study. He was totally distracted. His attention was riveted to the contents of the letter. Alec looked at his watch and realized that was when Thomas was scheduled to get the shot.

The letter described how the shot was to be administered. He imagined Thomas naked on the table as the needle penetrated his tiny scrotum. As Alec learned about the effects of

the drug, his 6" member began to harden. He read on and learned that Thomas and Eddie would be sexually excited almost constantly.

Alec imagined his brothers Thomas and Eddie with constant boners. Alec reread the letter as his hand caressed his throbbing member through his cargo shorts. He read the part about the boys being more comfortable naked because of the sensitivity of their erections. Alec tried to imagine his younger brothers going naked around the house with erections. The mental image of cute little Thomas naked with a boner standing in front of him caused a groan of pleasure. Alec tried to imagine the 11 year old having 8 to 10 dry orgasms a day.

That thought made Alec clutch his raging manhood. The pleasure of fondling himself was better than normal because he wore no underwear. Alec's eyes clouded with lust as he looked down and saw the precum stain on his tan shorts start to grow. Alec closed his eyes and envisioned Thomas and Eddie stroking each other's erections. Alec had just seen Eddie naked yesterday in the bathroom and he wondered how the boy would look with his pubic hair gone.

Alec imagined himself dropping to his knees as he fondled their hairless penises. He allowed himself to think about his secret fantasy of sucking both of his brothers. He imagined their erections held tightly in his hand as he lowered his mouth on both of their members at the same time. The fantasy was so vivid that he could taste them. The fantasy was so vivid that Alec was not even aware of the rhythm his hand had developed. In his fantasy his hands were all over his naked brother as he sucked them. He listened to them groan and moan with pleasure and felt their young bodies shake with a powerful dry orgasms. As he pictured the boys face fucking him, he imagined himself naked with his throbbing member rubbing against the boys bare legs.

The fantasy was too vivid. There was nothing that Alec could do about the pressure that developed in his loins. As he imagined in his fantasy his penis erupting semen all over his little brother's legs, he groaned as he member began to erupt in real life. The first blast of hot semen soiled the front of his shorts just as his mother walked through the back door.

Alec pulled his hand away from his member as if it were a bare hand touching the surface of a hot stove. It was too late. Alec was in full orgasm and his lean, teen body could not stop the ejaculation of boy seed. Alec could not stop humping his erection against the fabric of his shorts. It was one of the largest orgasms of his young life because he had not been able to masturbate for the past two days. All of that pent up semen exploded in his obscenely tented shorts and now ran down the front of his right leg. He mother watched in amazement as the semen dripped slowly on his bare foot. The right side of his shorts was so wet it looked as if he wet his pants.

Catherine watched as her good looking young son experienced a powerful orgasm. It had been several days since she and her husband Jim made love. In moments her love juices were flowing. It was one thing to see her 17 year old son's crusty underwear in the

laundry and imagine him masturbating. It was quite another thing to actually see the boy have an explosive orgasm. As Alec's orgasm subsided, Catherine realized that her panties were soaked. She needed to masturbate and wanted a strong visual image to enhance her pleasure.

Alec you'd better let me have those shorts. Catherine stared at the tent in his shorts and extended her hand to receive the semen soaked shorts. Alec started to protest and thought better of it. He unzipped and stepped out of the semen soaked shorts and handed them to his mother. His member had not become flaccid like it normally does. Catherine saw that the long tail of Alec's t-shirt covered his erection. She noticed that the tail of his shirt was wet in front from the jets of his hot semen. She told Alec that his shirt was wet too and extended her hand for the shirt. She stared at the place his t-shirt was tented by his erection and waited for his boyhood to be revealed. Alex hesitated only a moment as he took in the fact that his mother stared at the spot where his erection tented his shirt. She followed the tail of his t-shirt up as it first revealed his scrotum that was still drawn up after his orgasm. As the tail of the shirt continued to climb, she studied his erection. She decided that he must be turned on by this strip tease in front of his mother. She saw his light blond treasure trail that extended from his sandy blond pubic hair up to his navel. Her eyes studied his tight abs and how the tip of his erection rested against them. His nipples were erect and she wanted to reach out and run her fingers through the blond hair in his arm pits. Her body shivered as she imagined this beautiful young man between her legs. Like her son, Catherine vividly imagined his throbbing member deep in her core. As Alec stripped the t-shirt off his naked body, Catherine suggested that the semen be mopped from his foot with the shirt.

Alec handed his mother the semen soiled shirt and walked toward his room. Alec's room was next door to his parent's bedroom. Their headboards backed up to the same wall. He frequently masturbated to the sound of his parent's love making and the rhythm of the headboard as it bumped against the wall. Alec was still very aroused by both his orgasm and strip tease in front of his mom. He stretched out on his bed as he heard the sound of his parent's bedroom door being closed. He knew his mother used a vibrator when his dad was away on long trips. The sound of the vibrator penetrated the wall and he heard his mother groan.

Catherine was stretched out on her bed and she plunged the large vibrator in her vagina that was flooded with her juices. She gasped as the tip of the vibrator reached her core. She quickly developed a rhythm and imagined that it was Alec's member deep inside her. Her other hand lifted the semen soaked t-shirt to her nose and she felt the boys wet seed on the tip of her nose. Her tongue snaked out and tasted his young essence and she imagined an explosion of his hot semen deep inside her.

Alec began to masturbate slowly as he listened to the sound of the vibrator and his mother's occasional yips of pleasure. In a matter of minutes, the unmistakable sounds of her orgasm echoed through the wall. Alec thought that she must have been very turned on by his sexual display. Alex and Christine simultaneously reached their climaxes as the sound of the school bus as it squeaked to a stop. Neither of them could stop. The

pleasure was too intense. Their orgasms subsided just as the two younger boys walked down the hall.

Eddie's voice carried down the hall. They must not be home, he said as he led his little brother Thomas down the hall. Whoa dude you really are hard, Eddie said as he felt the front of Thomas' pants.

Thomas told Eddie about the strange way he felt. He asked Eddie what was wrong with him.

Come on Thomas. I want to show you how to make it better, Eddie told him. Eddie stopped his little brother and stripped off his shorts and t-shirt and left them on the floor in the hall. When they got to Eddie's room, he stripped naked too while he stood in front of his little brother.

Thomas tried to take it all in as he looked at his big brother get naked. This was the first time Thomas had seen Eddie naked up close. Eddie had close cropped blond hair and a lean body from swimming and surfing. His 4 1/2" erection mesmerized Thomas.

Thomas looked up into his brother's deep blue eyes. He told Eddie how cool his boner looked and asked if he could touch it.

Eddie nodded as he took hold of Thomas' little boy erection. Eddie started to stroke the small member. Eddie grinned as the younger boy groaned from the pleasure. Eddie told his younger brother that he needed for him to stroke his boner too. In moments both boys had a good rhythm going.

Maybe you'd better stop Eddie...it's feels really weird, Thomas told his 13 year old brother.

Gotta keep goin Thomas...trust me, Eddie told his little brother.

The sound of his little brother's sexual exploration drew Alec out of his room like a magnet. Alec stood in the doorway stark naked and watched as the two boys stroked each other. The fresh semen Alec had just ejaculated ran down his abdomen into his pubic hair. After a few moments Alec felt a hand in the small of his back and his looked over to see his mother standing next to him naked.

It was then that young Thomas cried out as the dry orgasm rocked his young body. Eddie told Thomas he was going to cum too and he rubbed his rock hard member against Thomas' naked chest.

Oh god Thomas I am cummin, Eddie cried out with when would be his last wet orgasm for a while occurred. His hot semen splashed all over his little brother's chest and belly.

Ewww...what's that, Thomas asked his big brother. Did you pee on me?

No...it is just sperm...you know the stuff that makes babies, Eddie explained.

Catherine's hand trailed down Alec's hips and stroked the hair at the top of his thigh. They are beautiful aren't they; she asked the blond hair and blue eyed Alec as her fingers lightly stroked his hip.

This was going to be a night that changed all of their lives forever.

---

Jason Rode the Bus Home:

15 year old Jason walked to his bus. He and Tommy, another 10<sup>th</sup> grader, both had major boners. Tommy's erection caused his khaki pants to bulge out in front of him. Both boys were quiet on the way home. They rode on one of the older buses that did not have very good suspension. Every time the bus hit a bump the boys were bounced around. All of the motion was too much for Tommy. About half way home he cried out as a powerful orgasm overwhelmed his body. The tip of his penis had slipped out of the fly of his boxers and his penis was pressed directly against the fabric of his khaki pants. Tommy grabbed his erection through his pants and held it as his 15 year old body had a massive eruption of semen. The two girls in front of them turned around when they heard Tommy cry out from the pleasure of his orgasm. As the girls watched in amazement, Tommy's hot semen flooded through his pants. The thick creamy seed covered the front of his pants and his orgasm seemed like it would never stop.

Jason watched his best friend's semen erupt. He could not take his eyes off of the puddle of hot creamy semen that collected in his friend's lap.

When Tommy caught his breath, he asked Jason why he didn't have an orgasm. Jason turned a deep red color as he blushed and told his friend that he erupted when the doctor examined him. The girls giggled when they heard that Jason exploded semen in the doctor's hand. He explained that the doctor pulled back his foreskin and rubbed precum off the tip of his penis. When Dr. Josh did that, Jason said that his penis erupted his seed all over himself and the doctor.

Jason stood up as the bus approached his stop. He saw his friend Sally staring at the bulge in his pants. As he stood and waited for the bus to come to a stop he thought she might reach out and fondle his erection. This was indeed a very strange day.

As Jason walked off the bus he saw that several of the older guys had had orgasms too. One guy was openly stroking his erection when he walked by. So were some of the younger boys. The woman who drove their bus could not take her eyes off of his erection. Jason could not wait to get in the house and get naked. He imagined lying on the bed while he slowly stroked his boyhood.

---

4:00 pm - Jason arrived home from school.

Jason walked in the door and called out to see if anyone was there. Blessedly no one was home. He walked slowly up the stairs and as he walked down the hall he stripped off his shirt and dropped it on the floor. Next he kicked off his shoes as he walked down the hall. His jeans dropped to the floor next followed quickly by his boxer briefs. He left his socks on and fell back on the bed. He had already masturbated three times that day and yet it felt like he had not had sexual release in months.

He stroked his member slowly and in minutes his penis erupted. Jason noticed that he shot much less semen than normal. Jason was naked on his bed and mopped up his hot semen with a t-shirt he had used several days as a cum rag. It was pretty crusty.

Jason called his girl friend Janie and told her about the things that Dr. Josh told him this afternoon. Jason and Janie had been having oral sex and had masturbated each other frequently for the past few months. Jason very much wanted to take it to the next level, but Janie was afraid of pregnancy. She did not want to ask for the pill. On a small island it was very hard to do anything with out the whole community knowing about it. She was too embarrassed and was sure her parents would have freaked out if she asked them about taking the pill.

Jason explained that by tomorrow he would not be able to produce semen.

You mean that you won't produce any sperm at all? Janie asks him.

Yeah...doc said by this time tomorrow I won't shoot any sperm. Jason told her.

And the doctor told you that everything else would work like normal? Janie asked her hot looking boy friend.

Yeah...the doc said girls like it even better. Imagine...like if it was hard all of the time...even when I just had a climax...it won't go down. Jason told her wondering what she'd think.

Whoa dude...you're gonna be some kind of hot stud...that would be so hot Jase. Janie slid her hand down into her bikini underwear. Her fingers slowly massaged the special place while she talked to Jason. Her pleasure amped up slowly. You and I could do IT all night and you'd like never get soft. And I can't wait to see you looking all shaved and stuff...you know how hot that made me when you shaved that time.

Jason was rock hard and stroked himself while he talked to Janie. Janie kept telling Jason how bad she wanted to see him smooth. The vivid description of what Janie thought about him being hard and smooth was too much. Soon Jason groaned and cried out to her, oh baby...gotta...uhhhhhhn. Oh Janie...thinkin about you and me naked and makin love.

Janie cried out as her orgasm washed over her 14 year old body. Janie moaned as waves of pleasure washed over her body. Jason started to come down from the high of his orgasm. Jason grabbed his t-shirt to clean up when he notices that there was no semen on his chest.

Baby...you aren't going to believe this. I just had a great 'gasm and there was no seed... anywhere...nothing to clean up. He told her he was still hard. I wish you were here...I need to go again.

Janie told Jason how hot that sounded. She fingered her throbbing clit as she thought about his hardness buried deep inside her. Janie told Jason just how much she needed him. She told him they had to find a way to be alone tomorrow.

After they said good bye, Jason walked down the hall stark naked to take a shower. While Jason was in the shower he pleasured himself to orgasm again. He dried off and tossed the towel in the hamper. He walked out of the bathroom naked. Jason walked toward his room as his 12 year old sister Tricia was coming down the hall the other direction toward Jason.

Tricia's mouth dropped open as she saw her naked brother. Tricia cannot believe her big brother was walking down the hall naked with the beginnings of boner.

Whoa dude...you look hot. Mom and Dad said you would be naked more but I didn't expect this. Tricia told Jason that she has never seen a dude naked with a boner. Her eyes are glued to his member. Jason started to get hard again. Much to Tricia's surprise Jason stayed there and talk with her.

Jason acted as if being naked with Tricia was normal. While he is stood there his penis became ridged. Now Tricia can't take her eyes off of the throbbing erection.

You look hot bro...I have never seen you like this. All Tricia thought about was his throbbing member buried deep in her core. Tricia felt herself shiver with a small orgasm that began to flood her sacred place with juices. Soon her panties were soaked.

Jason's mother rounded the corner and found Jason and Tricia in the hallway. Jason stood there naked as the day he was born...well not exactly...he didn't have an erection when he was born. Amy knew that her son needed to be naked more. She just didn't expect the need to be this great the first night.

Jason saw a worried look on Tricia's face. Amy walked up and looked at Tricia. This was what we talked about last night, Amy told her kids. She explained again that Jason needed to be naked more than usual. Amy looked over at her handsome son's face. She saw the concerned look and her eyes travel down his chest to his erection. Amy forced herself to be cool about standing next to her beautiful boy who was naked with an erection.

I guess the drug is beginning to take effect, Amy told Jason as her eyes studied his throbbing member.

Jason told his mom about the power effect of the drug. I just jacked off...er uh masturbated and when I climaxed there was no semen. It still felt really awesome...ya know...just nothing ejaculated.

Well the letter said that was supposed to happen. Other than that do you feel okay, Amy asked her boy.

Well it's kind of weird. Normally when I...you know...jack off...I am okay for a while...like not hard...but look at me. Jason points at his throbbing erection. I am really hard again and need to get off.

Tricia looked at his member and then looked into her brother's brown eyes. Jase it is just hard for me to believe that you are not going to sperm...you're so developed.

I couldn't believe it either. I stroked myself when I talked to Janie and had a powerful 'gasm but no seed came out. I just jacked again in the shower and didn't cum then either. It was weird. But I guess it isn't any weirder than standing here naked with a boner talking to my mother and 12 year old sister about jackin off. This is gonna be really strange.

Amy rested her hand on Jason's shoulder. Why don't you just take care of it Jase? Her hand trailed down his back and suddenly she realized that her hand rested on her 15 year old son's naked hip. You're right Jase, she told him and she pushed him toward his bed. This was going to be very weird Amy told Jason. She told him to jack off again.

Jason shrugged and walked into his room. He flopped on to the bed and stretched with his hands above his head. Since he didn't close his door, his cute little sister walked in and stood beside his bed and admired him stretch out with his lean muscular body. As Tricia watched, Jason stroked his erect member. He stroked it for several minutes with his eyes closed and his baby sister watching. Jason imagined Tricia standing next to him naked and he had his finger buried deep in her core.

Tricia put one hand in her running shorts and found the place that gave her so much pleasure. Tricia's other hand lightly stroked the top of Jason's thigh sending electric shocks of pleasure though his body.

Oh Tricia...I need to....aaahhhh....need to...oh baby here it cums...

Tricia watched as Jason's body shook with a powerful orgasm. His testicles ached to be ejaculating his semen but there was nothing there to release. It was a dry orgasm and Jason gasped for breath. He just had a rock-the-world orgasm in front of his little sister and he's was still as hard now as he was before he climaxed.

Tricia looks at Jason. Nothing happened, she tells him.

Oh yes it did. I had the powerful sexy feeling of a wild orgasm. But no cum ejaculated, Jason told his cute little sister. And look...he pointed to a rock hard member.

Whoa...if you had sex with a girl can she get pregnant? Tricia asked her naked 15 year old brother.

No she can't get pregnant. He explained that it was perfectly safe to have sex with him. .

Amy walked by Jason's room and couldn't believe that Tricia had been looking at her brother's erection while he masturbated. She suddenly had very mixed emotions about Tricia being with Jason. As Amy watched Tricia and Jason she shook her head to clear it. Her beautiful 12 year old daughter looked at her naked 15 year old brother. Tricia's body blocked Jason's ability to see his mother in the door way. Amy listened to her son tell his sister that it is safe to have sex with him. Jason's erection and his hand wrapped around it were clearly visible from the door way. Amy couldn't believe the lustful feelings that raced through her body as she looked at her viral son.

As Amy cleared her throat, Tricia turned to look at her mother. Amy asked Tricia if she didn't think her brother needed privacy so that he could take care of his need?

Jason just masturbated, Mom...I watched him...It had no effect...Tricia pointed at the erection that wouldn't subside. Her mother watched as Tricia stepped aside and gasped as her young daughter's hand pulled the erection so that it stood straight up from his sleek young body. Tricia looked at her mother and told her that her brother's throbbing erection won't go down.

Amy felt she needed to tell Tricia that she shouldn't have touched her brother achingly hard erection. She couldn't tell her. She watched them together and it made Amy's panties very wet. Amy visualized in her head the boy boner having pierced her own sacred place. She wondered what Jason's erection would feel like if it penetrated her.

As Amy watched her 12 year old daughter hold her 15 year old brother's manhood, another image flashed through her brain. Amy suddenly imagined Jason and Tricia young bodies united in intercourse. In her head she saw the boy's blood streaked member having just pierced his sister's hymen. Amy's body shuddered and her love juices flowed freely as she imagined their bodies coupled. Her mind was boggled that she had an orgasm while she imagined her children having intercourse. It was too much.

Tricia was steered away from her naked brother by her anxious mother and she was told that he needed privacy. As Amy led Tricia away she realized that her panties were so wet that it felt like she had wet her pants. She wondered how the two lust filled children could be kept apart. Amy wondered if she could resist Jason's amazing hardness. Her body shuddered again as she imagined Jason between her own legs.

---

Down the street, Jason's girlfriend Janie was sitting on their screened porch. She needed to study for English literature. As Janie looked at the page, Janie visualized Jason's hot looking body naked on his bed. She imagined the 15 year old erection being stroked to another powerful orgasm. Her panties were soaked as the love juices flowed from her young body. She imagined the gorgeous boy unable to ejaculate...she wondered.... should she...still a virgin...his hot penis buried deep inside her core. Her juices flowed...Janie ached deep inside. Her fingers massaged her clit through her shorts. She walked up the steps to go to her room. Janie forgot her brother Billy had the shot too.

As she walked down the hall Janie was startled to see her 12 year old brother on his bed naked. Oblivious to his sister's stare, Billy stroked his young member. Billy needed sexual release again.

Janie cannot help herself; she walked into Billy's room and sat on the edge of his bed. Billy continued to massaged his rigid member. Janie rubbed his lower leg and told him how hot he looks with a boner. His sister's touch and her comment about his hot boner was enough. Billy's body shuddered again and again with a violent orgasm. He pumped his rigid erection until the powerful feeling ended.

Billy's orgasm made Janie's thong wet as he sacred place filled with her juices. She watched his young body convulse and he humped his hand as if it is a vagina. She knew it must be an amazing orgasm because his toes curl with the powerful feeling that kept washing over his young naked body. It was such a powerful feeling and then suddenly the pleasure released its hold on him.

That was really hot Billy. I can't believe I sat here and watched you pleasure yourself, Janie told Billy as she leaned over to kiss his cheek.

Janie was standing by the bed ready to leave and saw that Billy was dry and his erection was still rock hard.

Dude...you are still hard, she told Billy.

Yeah no shit...Billy says as he pulls his erection away from his body and lets it snap back against his belly making a loud slapping sound. He explained that he was ready to go again.

No way...you could do it again right now? Janie asked her little brother.

Billy started to stroke himself again. Janie's eyes drank in every detail of his cute young body. She stroked his leg as she watched him pleasure himself. Her fingers are between his legs.

Billy felt her spread his legs and begin to fondle his scrotum. Billy started breathing hard as the tension in his loins began to build again.

Jane watched in amazement as his body convulsed again with another powerful dry orgasm. Billy's body was covered with a sheen of sweat as his hand fell away from his still throbbing erection.

Janie realized that it was just that...still an erection.

She lightly fondled Billy's hard penis. Her father walked into Billy's room. Janie looked at her dad and told him that she just watched Billy have 2 orgasms. She told her daddy that Billy was still hard.

Their dad told her that if Billy had privacy he could take care of it.

Jane nodded and turned to leave.

His father walked over to Billy. He asked Billy if there was anything he needed as he rubbed Billy's abdomen. His hand slipped under the boy boner and rubbed against his erection.

It's so hard Dad, Billy told him.

His Dad reached out and took hold of his erection. It was very hot and very hard. Maybe if you stroked it again his father told him.

Billy couldn't believe that his father and his sister had just played with his boner. His boner ached for release again. In moments Billy stroked to another mind blowing orgasm. During this 'gasm Billy imagined his throbbing member buried deep between his sister's legs.

### Down the Street from Janie and Billy

Brandon Smith talked to his girl friend Emily who lived down the street. She was 13 and Brandon just turned 14. They had been masturbating each other and pleasured each other with oral sex for the past 4 months.

Emmy you won't believe it. I just jacked off and there was no sperm. It was completely dry. He told Emmy how weird it was that his penis was still erect.

Are your parents there? Emily asks Brandon.

No they are at school at the parents meeting, Brandon told her.

Do you want to come over? Emmy asked him.

Oh yeah that would be so hot, Brandon tells the cute cheerleader.

Okay she said that she was going to be there in a few minutes.

Brandon was so turned on at the thought that Emily was coming over, that he masturbated again and that is when his little brother Steven walked in. Steven was 11 and one of the very first to get an injection from Dr. Josh.

Brandon...so hard...hurts...help me, Steven begged his big brother.

Brandon held his arms out and asked his little brother to come to him. He pulled the little boy on top of him and began to hump against his cute little brother. He grunted, do like me to Steven.

Steven quickly got the idea and ground his baby penis against his older brother. The two brothers were in full orgasm when Emmy arrived. She put her hand down her leotard because she just got home from dance class. Emmy couldn't believe the two cute boys locked in an orgasmic embrace.

Oh god Brandon...you are so hot... Emmy said as she stripped off her tights and leotard and stood before Brandon naked.

Brandon allowed Thomas to roll off his chest on to the bed as he put his arms out for Emmy.

Baby you're so hot. He pulled her tiny body on top of him and felt her moist labia engulf his naked penis. They kissed passionately as Emmy slid down his young member. The tip of his erection was restrained by her unbroken hymen. Their tongues dueled as he groaned from the intense pleasure.

Emmy sat up and Brandon felt his penis penetrate her virgin core. He felt the resistance that held his penis back suddenly snap. Brandon's boyhood penetrated Emmy.

Oh god Bran you feel so good...need you so bad, Emmy told him.

Thomas watched as his brother and cute girl friend begin to mate. His small hand rubbed Emmy's back as he watched their first mating.

The two young bodies ground together creating unbelievable pleasure for both Brandon and Emmy. Emmy cried out as a powerful orgasm rocked her body. That was enough for Brandon and he thrust his hips up off the bed driving his young boy member deep in Emmy again and again. Brandon screamed with the intense pleasure of their first mating.

Steven saw their mom and dad just as Brandon cried out in orgasmic ecstasy. His parents walked up and watched their older son made love to his little girl friend. Brandon and Emmy's orgasms were just subsiding.

Brandon you need to get your penis out of Emily right now...you'll get her pregnant, his mother told him.

Brandon turned to the sound of his mother's voice. His mind was still fogged in post orgasmic bliss.

No problem mom...not firing any bullets, Brandon told his mom. His erect member stayed buried deep in his cute girlfriend. She is so hot mom...felt so good. Need to fuck her again.

His mother, shocked into speechlessness, said nothing as her hand explored her sacred place.

With that Brandon flipped Emmy over into the missionary position. He stayed firmly mounted. It was like watching two wild animals mate. Brandon desperately needed sexual release again. His father was in a position to see that the boy's young member was streaked with the blood of first intercourse. His father absently stroked his member through his pants as he watched his boy and Emmy continue their wild coupling.

Brandon began to thrust again deeper and deeper into the young beauty below him. His parents watched them mate with open mouths until Emmy cried out in the throes of a powerful orgasm. They watched Brandon piston his erection deep in her core again and again until he was possessed by another intense orgasm. He was totally lost in the moment of passion.

As his orgasm subsided, Brandon watched Steven masturbate to another climax as he stood beside the bed. Steven was soon completely overwhelmed by another mind bending orgasm as he studied his older brother and Emmy still locked in a sexual embrace.

9:30 – It has been a wild night of sexual discovery and it is not over....

**I hope you enjoyed reading the first chapter of Boner Island. Please let me know if this is a story that you would like to see continued. If you like the story and want me to continue it, please let me know at [mack1137@gmail.com](mailto:mack1137@gmail.com) or with a comment on my blog [mack1137.sensualwriter.com](http://mack1137.sensualwriter.com). This story has lots of possibilities for first time experiences and family sexual adventures. It would be very helpful if you would share the details of your first time and/or experiences with family sex as a source of ideas for the continuing story. Thanks for your help and comments.**

**Mack**

Thanks for reading...keep jackin!
